

geographeTM
DESIGNED TO DELIVER.

WHO IS GEOGRAPHE?

Geographe Africa is a trading name of Spare Power who hold an exclusive local manufacturing licence for Geographe parts.

All manufacturing is performed by Johannesburg-based engineering companies vetted by Geographe Australia. They are subject to our ongoing monitoring and review for quality and delivery on-time performance.

A dedicated Project Manager is employed to ensure the consistency of our product quality.

Geographe Africa via Spare Power can manufacture and supply locally made components for the majority of Geographe's catalogue.

Providing it is a current Geographe product, parts not currently in our manufacturing portfolio can be added if required.

LOCAL SUPPLIED CONTENT (BEE COMPLIANT)

- Material supply (local supplied steel bar stock, forgings & castings)
- Precision machining (Turning, milling etc)
- Heat treatment
- Precision grinding
- Third party inspection for regular QA checks outside the ISO9001 based quality system employed

OUR CUSTOMERS INCLUDE:

- Thiess Botswana
- Vedanta- South Africa
- Anglo Mogalakwena
- Inala Mining
- Moolmans Mining

- Vale Mining - Mozambique
- BHP- Seriti
- Goldfields- South Deep
- Glencore DRC- Congo
- Trollope Mining
- Tharisa Minerals.

MACHINERY SUPPORTED

- Atlas Copco Underground Drill Booms
- Caterpillar Haul Trucks - 777, 785 & 789/793 793F
- Caterpillar Dozers - D10, D11
- Caterpillar Loaders - 992G, 992K
- Caterpillar Excavators - 6030, 6040, 6050, 6060, 6090
- Hitachi Excavators - EX2500, 3600, 5500 & 8000
- Komatsu Haul Trucks - 730, 830 & 930
- Liebherr Excavators - 994, 996, 9250, 9350, 9400 & 9800
- Sandvik Underground Drill Booms

QUALITY ASSURANCE & IP CONTROL

- Spare Power are bound by a strict licencing agreement.
- All local suppliers are bound to a strict NDA bound to the same conditions that Spare Power must adhere.
- Geographe has complete autonomy to review our South African suppliers for quality, integrity and sales movements.
- Geographe through Spare Power honours all quality related issues with the same warranty provided to Australian and other international clients.
- ISO 9001 is the basis of our product quality guarantee - "The product is our own"

THE GEOGRAPHE DIFFERENCE

Geographe parts are engineered to match all the specifications of the OEM's. The major difference is that Geographe Enhanced Performance (EP) parts are designed to last longer than the OEM equivalent item, delivering optimal performance at reduced operating costs.

The Geographe range of EP parts adds significant value in extending equipment life and machine service intervals. Being fully supported by Geographe Australia (who have over 50 years' experience in manufacturing and supplying the mining industry) ensures that Geographe Africa will be able to deliver Unequalled Reliability, Reduced Costs and Higher Performance.
